

Amendments to the Claims

Please amend the listing of claims as follows:

1. (Original) Gearbox drive unit (1), especially for adjusting movable parts in a motor vehicle, comprising at least one housing part (2) and at least one fixing dome (6, 7, 8, 9), which is used to secure the gearbox drive unit (1), characterized in that the housing part (2) comprises a first connection point (45) and at least one other second connection point (46), whereon the fixing dome (6, 7, 8, 9) can be placed, and that the fixing dome (6, 7, 8, 9) is connected to the housing part (2) at either the first connection point (45) or at the second connection point (46) according to a screw image for fixation of the gearbox drive unit (1).
2. (Original) Gearbox drive unit according to Claim 1, characterized in that the fixing dome (6, 7, 8, 9) features a projection (20), which engages in a groove (21) embodied on the housing part (2) of the gearbox drive unit (1) in order to create the connection between the fixing dome (6, 7, 8, 9) and the housing part (2).
3. (Original) Gearbox drive unit according to Claim 1, characterized in that the fixing dome (6, 7, 8, 9) is connected to the housing part (2) of the gearbox drive unit (1) by means of a dovetail connection.
4. (Currently Amended) Gearbox drive unit according to ~~one of Claims 1 to 3~~Claim 1, characterized in that the fixing dome (6, 7, 8, 9) is connected to the housing part (2) of the gearbox drive unit (1) by means of a welded connection (22).
5. (Original) Gearbox drive unit according to Claim 1, characterized in that the fixing dome (6, 7, 8, 9) is connected to the housing part (2) of the gearbox drive unit (1) by means of a screw connection.

6. (Currently Amended) Gearbox drive unit according to ~~one of Claims 1 to 5~~Claim 1, characterized in that the gearbox drive unit (1) includes several fixing domes (6, 7, 8, 9) of the same type, that a plurality of connection points (45, 46) are provided on the housing part of the gearbox drive unit (1), whereon the fixing domes (6, 7, 8, 9) can be placed, that the fixing domes (6, 7, 8, 9) are connected to the housing part (2) at selected connection points (45, 46), whereby the selected connection points (45, 46) are selected according to the screw image for fixation of the gearbox drive unit (1).
7. (Original) Gearbox drive unit according to Claim 1, characterized in that at least one other fixing dome (6, 7, 8) is provided and that the fixing dome (6, 7, 8) and the other fixing dome (6, 7, 8) have a common base body (40) so that they can be connected jointly to the housing part (2).
8. (Original) Gearbox drive unit according to Claim 7, characterized in that the housing part (2) has, at least in sections, a circular ring-shaped section (5), that the common base body (40) of the fixing dome (6, 7, 8) and of the other fixing dome (6, 7, 8) partially surrounds the circular ring-shaped section (5) and can be connected at the first (45) and the second connection point (46) with the circular ring-shaped section (5).
9. (New) Gearbox drive unit according to Claim 2, characterized in that the fixing dome (6, 7, 8, 9) is connected to the housing part (2) of the gearbox drive unit (1) by means of a welded connection (22).
10. (New) Gearbox drive unit according to Claim 3, characterized in that the fixing dome (6, 7, 8, 9) is connected to the housing part (2) of the gearbox drive unit (1) by means of a welded connection (22).
11. (New) Gearbox drive unit according to Claim 2, characterized in that the gearbox drive unit (1) includes several fixing domes (6, 7, 8, 9) of the same type, that a plurality of connection points (45, 46) are provided on the housing part of the gearbox drive unit (1), whereon the fixing domes (6, 7, 8, 9) can be placed, that the fixing domes (6, 7, 8, 9) are connected to the housing part (2) at selected connection points (45, 46), whereby the selected connection points (45, 46) are selected according to the screw image for fixation of the gearbox drive unit (1).

12. (New) Gearbox drive unit according to Claim 3, characterized in that the gearbox drive unit (1) includes several fixing domes (6, 7, 8, 9) of the same type, that a plurality of connection points (45, 46) are provided on the housing part of the gearbox drive unit (1), whereon the fixing domes (6, 7, 8, 9) can be placed, that the fixing domes (6, 7, 8, 9) are connected to the housing part (2) at selected connection points (45, 46), whereby the selected connection points (45, 46) are selected according to the screw image for fixation of the gearbox drive unit (1).
13. (New) Gearbox drive unit according to Claim 4, characterized in that the gearbox drive unit (1) includes several fixing domes (6, 7, 8, 9) of the same type, that a plurality of connection points (45, 46) are provided on the housing part of the gearbox drive unit (1), whereon the fixing domes (6, 7, 8, 9) can be placed, that the fixing domes (6, 7, 8, 9) are connected to the housing part (2) at selected connection points (45, 46), whereby the selected connection points (45, 46) are selected according to the screw image for fixation of the gearbox drive unit (1).
14. (New) Gearbox drive unit according to Claim 5, characterized in that the gearbox drive unit (1) includes several fixing domes (6, 7, 8, 9) of the same type, that a plurality of connection points (45, 46) are provided on the housing part of the gearbox drive unit (1), whereon the fixing domes (6, 7, 8, 9) can be placed, that the fixing domes (6, 7, 8, 9) are connected to the housing part (2) at selected connection points (45, 46), whereby the selected connection points (45, 46) are selected according to the screw image for fixation of the gearbox drive unit (1).
15. (New) Gearbox drive unit according to Claim 9, characterized in that the gearbox drive unit (1) includes several fixing domes (6, 7, 8, 9) of the same type, that a plurality of connection points (45, 46) are provided on the housing part of the gearbox drive unit (1), whereon the fixing domes (6, 7, 8, 9) can be placed, that the fixing domes (6, 7, 8, 9) are connected to the housing part (2) at selected connection points (45, 46), whereby the selected connection points (45, 46) are selected according to the screw image for fixation of the gearbox drive unit (1).

- . . .
16. (New) Gearbox drive unit according to Claim 10, characterized in that the gearbox drive unit (1) includes several fixing domes (6, 7, 8, 9) of the same type, that a plurality of connection points (45, 46) are provided on the housing part of the gearbox drive unit (1), whereon the fixing domes (6, 7, 8, 9) can be placed, that the fixing domes (6, 7, 8, 9) are connected to the housing part (2) at selected connection points (45, 46), whereby the selected connection points (45, 46) are selected according to the screw image for fixation of the gearbox drive unit (1).
